

KHRYSTYNA QUIRINO

Senior Frontend Developer & Team Lead - React

@krystyna.shvets@gmail.com  linkedin.com/in/khrystyna-quirino  Lisbon, PT

SUMMARY

Starting as a Frontend Developer and evolving into Team Lead and Head of Usability, my journey has been driven by a deep passion for delivering exceptional UX/UI and crafting digital experiences that make a lasting impact. Along the way, I've focused on nurturing talent and driving innovative, user-first solutions across every project.

STRENGTHS

Communication & Conflict Facilitator

Effectively translating technical implementation, collaborating with the design team, stakeholders, and colleagues. Fostering positive collaboration and a supportive environment to achieve common goals.

Project management and prioritization

Efficiently prioritized tasks, employing agile methodologies to impartially focus on essential needs. Developed through critical projects with tight deadlines.

Creative Eye & Product Thinking

Cultivated creativity through continuous learning, trend awareness, and product-focused thinking. Employed innovative design, attention to detail, and critical analysis to deliver high-quality solutions.

Proactivity

Anticipated challenges, offered valuable UX/UI suggestions to enhance team productivity and project outcome.

EXPERIENCE

Team Lead

Unlockit Feb 2024 - Present, Lisbon PT

During this experience, I contributed to the development of innovative web applications at a forward-thinking company reshaping the real estate market — making property transactions faster, easier, and more secure through smart digital solutions.

- Led frontend development with focus on code quality and team support
- Participated in product prioritization to align technical work with goals
- Mentored junior developers and collaborated through pair programming
- Conducted code reviews to ensure consistency, performance, and clean practices.

Senior Frontend Developer

Unlockit Nov 2023 - Present, Lisbon PT

- Led frontend development as part of a cross-functional team to deliver the first version (after MVP) of a product that reduces bureaucracy in real estate processes (sales, rentals, swaps).
- Built a platform where agents, sellers, buyers, and lawyers work together in one place, with real-time updates on process status and missing steps.
- Collaborated with the design team to create and implement UX/UI mockups, ensuring a smooth user experience and consistent design.
- Developed unit tests and supported CI/CD pipelines to maintain high code quality and reliability.
- Defined the visual style and design system to ensure consistent, user-friendly UX/UI across all products.
- Helped design a new product that simplifies rental processes with a backend

that automates tasks and gives landlords peace of mind.

Frontend Developer / Team Lead

Momentum One 2021 - 2023, Lisbon PT

During this experience, I actively participated in the development of Web 2.0 and Web 3.0 client-side web applications, using React and other frontend technologies.

- Contributed to 3 integrated internal Web 3.0 projects: a notification WebApp, a social media-powered business mailing WebApp, and an OAuth system.
- Played a key role in developing an online booking web application with integrated PayPal payment and Commerce Layer API back-office.
- Participated in a subscription-based Next.js project with weekly subscriptions and a Strapi back-office.
- As Team Lead of 4 frontend developers in an Agile team of 20, managed two medium-sized projects. Conducted stakeholder meetings, delegated tasks, and provided mentorship, leading to successful onboarding and development.
- Enhanced user experience (UX) and UI design by offering proactive suggestions and actively participating in design iterations.
- Strengthened my JavaScript skills, gained expertise in TypeScript, React, Next.js, and Tailwind CSS, and gained valuable insights into Web 3.0, DApps, blockchain, and smart contracts.

Full Stack Developer

Perfumes & Companhia 2019 - 2021 Lisbon, PT

Worked with Perfumes & Companhia, a leading Portuguese luxury brand in perfumery, as a member of an Agile tech team of 10 individuals.

- Translated marketing team requests into development needs and provided accurate project timelines.
- Enhanced the online store (PHP), tripling its traffic capacity and improving resilience.
- Modernized the store with new features like Apple login, real-time product availability, address verification, and seamless payment options through internal API integration.
- Streamlined support team operations with a ticketing API and chatbot, ensuring smooth customer interactions and efficient issue resolution.
- Gained proficiency in PHP and the Laravel framework, continued utilizing

JavaScript (including jQuery) and CSS3/SASS, and developed expertise in building and consuming RESTful APIs through hands-on experience.

Frontend Developer

Multisnet 2017 - 2019 Lisbon, PT

Worked with Multisnet, a web development company, managing small to medium-sized projects for external clients.

- Experienced in creating fully functional websites and eCommerce platforms from scratch, incorporating modern design principles and user-friendly interfaces, including a custom CMS.
- Skilled in integrating various services, including Facebook and Instagram campaigns, to drive brand visibility and increase online engagement.
- Utilized PHP with the MVC framework CodeIgniter for website development, acquired knowledge in SASS, gained expertise in UX/UI, E-Commerce and enhanced SEO skills.
